

Team Name: sddec21-05

Team Members: Adam Marks, Zaid Kanaan, Meet Patel, Jordan Kirchhoff, Chandler Hagen

Report Period: Apr 13-Apr. 25

Summary of Progress in this Period

This period, we made sure we were on the same page as Buildertrend going into this summer. We started our presentation and made sure it followed the guidelines given to us by the professor. Mostly we tried to avoid anything new with the project so that we'd be in good shape for this fall when we start back up.

Pending Issues

We aren't sure about the windows 10 server we are using is rented out until next fall and we think it's only this spring. It shouldn't be too big of an issue, if we need to get new server space, it is a simple task. Other issues we are facing is uncertainty on a few parts of the presentation, but those should be resolved by the time we present.

Plans for Upcoming Reporting Period

For the rest of the semester, we just must give our best presentation we can and be prepared for next semester, which will be far more involved technology wise. We plan on following our gantt chart when we come back to school this fall, so when we start back up, we can start straight away.
