Senior Design Bi-Weekly Status Report; Spring 2021

Team Name: sddec21-05
Team Members: Adam Marks, Chandler Hagen, Jordan Kirchhoff, Meet Patel, Zaid Kanaan
Report Period: Jan 25 - Feb 14

Summary of Progress in this Period

The progress during this period was primarily made in touching base with buildertrend to get a baseline of communication, application requirements, and first meeting. We also got a discord set up for group communication and a google drive folder for any group documents.

Pending Issues

The main issues are getting a meeting set with our advisor(Professor Stoytchev), getting a base server up for starting development, and getting personal tasks defined for each of the team members (possible trello set up).

Plans for Upcoming Reporting Period

We plan to get started on development as a basic working UI and backend will allow us to start on more advanced requirements. We also plan on meeting with our advisor to touch base with him. As we only meet every other week, we need to make sure we don't push things off and make sure that everything is being kept up with.
